

VERSAFILLER P8EBFSLY ■ Contactless, Refrigerated, Split-Level **VERSAFILLER PEBFSLY** ■ Contactless, Non-Refrigerated, Split-Level Hydration Station Combo

This surface mount hydration station combo has two activation methods. The bottle filler includes an electronic sensor for a contactless (touch free) activation and a 30 second shut off timer. The drinking fountains are activated via one of four push-pads.

The Bottle Counter conveniently displays the number of times the unit has been used, encouraging the refill of sports bottles. Key Versafiller moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surfaces from discolouration, odours and degradation.

Suitable for public building, gymnasiums, sports complexes, hospitals, schools, and office
